### Polled vs. Horned Result

**Pc/H**

### Interpretation

**H/H** HORNED. No copies of either Polled molecular marker are present.

**Pf/H** POLLED. One copy of the Polled-Friesian molecular marker is present. At least 50% of the offspring will be polled.

**Pf/Pf** POLLED. Two copies of the Polled-Friesian molecular marker are present. All offspring will be polled.

**Pc/H** POLLED. One copy of the Polled-Celtic molecular marker is present. At least 50% of the offspring will be polled.

**Pc/Pc** POLLED. Two copies of the Polled-Celtic molecular marker are present. All offspring will be polled.

**Pc/Pf** POLLED. One copy of Polled-Celtic and 1 copy of Polled-Friesian molecular markers are present. All offspring will be polled.

### Additional Information

If testing for a disease or a disorder was performed and results indicate the animal is affected or at risk, we recommend contacting your veterinarian for further clinical evaluation and for additional information on disease and management.

For more detailed information on Polled vs. Horned test results, please visit our website at:  
[vgl.ucdavis.edu/test/polled-vs-horned](http://vgl.ucdavis.edu/test/polled-vs-horned)

For terms and conditions of testing, please see [vgl.ucdavis.edu/about/terms-and-conditions](http://vgl.ucdavis.edu/about/terms-and-conditions)

Results are determined using PCR-based methods. The results relate only to the sample tested as identified by the submitter (for example, identity and/or breed).
