**Clinic Details**

No clinic associated with this order

CentralStar Laboratory is not responsible nor in control of the sampling stage or quality of samples received. Submission is completed by DHI specialists, veterinary clinics, customers or other persons outside of the laboratory. Results reported relate only to the sample(s) identified and does not reflect the herd or operation as a whole.

The Neospora Caninum Antibody Test is an enzyme-linked immunosorbent assay (ELISA). The assay may be performed on individual samples of Bovine Serum. Results are determined by the sample to positive control (S/P) ratio and listed as a test value.

Individual Serum:

Test Values < 0.50 are classified as Negative

Test Values > 0.50 are classified as Positive
